- JavaScript
- MongoDB

SOFT SKILLS

- Leadership
- Time Management
- Team Work

EDUCATION

B.Tech	2019-2023
HSC	2019
SSC	2017

PROFESSIONAL PROFILE

As a MERN stack developer, my professional profile highlights my expertise in MongoDB, Express, React, and Node.js. I have experience developing scalable web applications and working collaboratively with development teams. My problem-solving abilities and excellent communication skills enable me to effectively explain technical concepts to non-technical stakeholders.

WORK EXPERIENCE

Web Developer

January 2023

As a MERN stack developer, I have worked on various projects developing web applications using MongoDB, Express, React, Next and Node.js. I have experience in designing and implementing RESTful APIs, integrating third-party APIs such as payment gateways, social media platforms, and location-based services.

PROJECTS

Electronic E-Commerce

Based on Next.js, Nod .js, and MongoDB.
The application provides an online platform for electronic commerce, allowing users to browse and purchase a wide range of electronic products, including computers, smartphones, supports various payment methods, including credit cards and online payment gateways.

Memories App

Based on React.js, Node .js, Express.js and MongoDB.
The Memories App is a MERN stack web application that allows users to upload, store, and share their memories. It features a user-friendly interface with functionalities such as user authentication, search, and filtering, and social media sharing. The back-end is built with Node.js and MongoDB, while the front-end is built with React.
